Instructions to Students

- Answer BOTH questions. Each question carries 50 Marks. Total: 100 Marks.
- Draw a clear and neat concept map for each question.
- Identify all key concepts and arrange them in a logical hierarchy.
- Show meaningful linkages between concepts using arrows and connecting words.
- Compare related concepts wherever required and justify the relationships clearly.
- Ensure the concept map is well-organized, readable, and properly labelled.

Question Type	Focus Area	Questions	Marks
Concept Mapping	Map algorithm efficiency concepts using asymptotic analysis, search techniques, recurrence relations, and recursion tree method	Q1 – Q2	Q1 –50 Q2 –50
GRAND TOTAL:		100 Marks	

SECTION A – CONCEPT MAPPING

Q1. Explain how dividing problems leads to recurrence formation. Extend the map by including parameters a and b . Justify how these influence final complexity. Interpret how this mapping connects algorithm design with analysis.

Q2. Explain how substitution method derives final complexity. Extend the map with Base Case and Induction Hypothesis nodes. Justify the need for proof in recurrence solving. Interpret how this map ensures correctness of derived complexity.
